

GIANT PROPERTY

11.3 Square Kilometres

1136 Hectares

**BIG ONE mineralized Zone in foreground
Zone hosts multiple sheeted polymetallic
quartz-carbonate veins up to 0.5m wide.
Veins are continuous and traced up to 250m
along strike.**

**REMAINS OPEN IN ALL DIRECTIONS
Newly exposed outcrop due to extensive
glacial melt.**

SAMPLE S023073

0.92 grams per tonne Gold

**1.5m wide oxidized shear in mafic volcanics
with quartz-pyrite-sericite alteration.**

Grab from Outcrop

SAMPLE S023069

0.78% Copper

**Malachite stained vein and wall rock from
fault in clay altered mafic volcanics.**

Grab from Outcrop

BIG ONE ZONE

- GIANT PROPERTY -

**Vuggy quartz carbonate veins in
outcrop of altered mafic volcanic.
Multiple parallel veins up to 0.25m wide
in 3m wide oxidized alteration zone.
Newly exposed outcrop due to extensive
glacial recession.
