

J2 SYNDICATE ELDORADO PROPERTY

The Eldorado Property was generated and staked by the J2 Syndicate in 2016, a private precious metal project generator in British Columbia. The Eldorado Property covers 3751 hectares, is located approximately 96 kilometers south of Atlin BC, and approximately 45 kilometres east of the historic Tulsequah Chief deposit.

Highlights Include:

- Additional grab samples extend Eureka zone to 3 km; the zone remains open.
- Seven bedrock grab samples assayed between 1 and 21.8 grams per tonne gold.
- Chip sample from bedrock assayed 21.8 g/t Au, 317 g/t Ag, 0.98 % Cu, 2.0 % Pb, and 3.37 % Zn over 0.90 m.
- Bedrock grabs returned up to 20 g/t Au, 431 g/t Ag, 7.04 % Pb, 1.07 % Cu, and 1.9 % Zn from different samples.
- Two As-Au-Ag-Pb-Cu-Sb talus fine anomalies were defined within the Eureka Trend: one 650 metres long and the second 340 metre long.
- Geological mapping, channel sampling, ground geophysics, trenching, LiDAR, and an alteration study is recommended to outline the full extent of the Eureka Trend in preparation for drilling.
